

DON'T BE SHY.....

Share a challenging patient scenario with your New England WOC nursing colleagues at our fall conference, held every October

- Select a complicated / challenging case (wound, ostomy, fistula, tube management or continence)
- Establish an objective / goal
- Give a brief history related to the case
- Have pictures of the case and treatment used
- Reference evidence based practice
- Prepare the presentation for 10 – 15 minutes & a one page outline for inclusion in conference binder
- Allow time for questions and comments
- An honorarium will be given
